

MAKE A SOUND MAP

Choose a spot to sit and listen somewhere along your walk.

Draw an x in the center of a piece of paper. The x represents where you are sitting. Close your eyes and listen quietly for five minutes. Draw a symbol to represent each sound that you hear. The location of the symbol should indicate the direction and distance of the sound from your listening spot.

*What sounds were familiar to you?
Did you hear any new sounds?
What made those sounds? What
was your favorite sound?*
